

Do7 · CIIAA · Justin Kim —

Instructions

The Confidential Information & Invention Assignment Agreement (CIIAA) does NOT need a new template — Pheeew already has the standard form on file from Jason and Dawon's onboarding.

Source template

Use one of the existing CIIAAs as the source:

- [05_CIIAAs/Pheeew_CIIAA_Jason-Ko.pdf](#) (recommended — most recent format)
- [05_CIIAAs/Pheeew_CIIAA_Dawon-Kim.pdf](#) (also valid)

These were generated from the standard Stripe Atlas CIIAA boilerplate. The template is identical for all founders — only name, address, date, and prior inventions list differ.

Steps to prepare Justin's CIIAA

1. Open [05_CIIAAs/Pheeew_CIIAA_Jason-Ko.pdf](#) in Preview (Mac) or any PDF editor
2. Save as: [Pheeew_CIIAA_Justin-Kim.pdf](#)
3. Edit fields:
 - **Employee Name:** Jason Ko → **Justin Kim**
 - **Address:** Jason's address → Justin's address
 - **Effective Date:** Jason's date → today's date
 - **Position:** COO → **CGO (Chief Growth Officer)**

- **Prior Inventions / Excluded IP:** Jason's list → Justin's list (Justin lists any pre-existing inventions or IP he wants to keep separate from Pheeew's IP — typically blank for first-time founders)

4. Send to Justin for signature (attach to E06)
5. Justin signs on the last page
6. Alex countersigns on Pheeew's behalf

Save signed copy

Final filename: `Pheeew_CIIAA_Justin-Kim_signed.pdf` Save to: `05_CIIAAs/`

What this document does

The CIIAA assigns to Pheeew, Inc. all IP that Justin creates during his service to the Company. This is critical for raise-readiness — investors require that all founders have signed CIIAAs so the company owns its IP unambiguously.

Without this, Justin could claim ownership of work product later and a future investor would balk during diligence.

When to send

After Email 6 (Justin's packet). Bundle with D04 (RSPA) and D14 (83b) so Justin signs all 3 in one sitting.
